Key Insights — World Happiness Report 2015 to 2019

- 1. Economic prosperity (GDP per capita), social support and health (life expectancy) are the strongest predictors of national happiness.
- 2. Finland consistently ranks as the world's happiest country from 2018 onwards, while South Sudan and Central African Republic remain at the bottom.
- 3. Global average happiness score remained relatively stable between 2015 and 2019 at approximately 5.38.
- 4. Freedom shows a moderate association with happiness, while generosity and trust in government show weaker correlations.

Note: Findings are based on visual trend analysis across 156 countries. Statistical validation via Pearson correlation is recommended for formal conclusions.
